 Pune, India

PROFESSIONAL SUMMARY

Software Engineer with 4+ years of experience building full-stack web applications, including production GenAI healthcare products spanning React.js frontends and Python/FastAPI backends. Skilled in REST API design, LLMs & RAG pipelines, authentication & security, and performance optimization. Proven track record of improving page load speed by 30%, reducing user-reported issues by 35%, and delivering production-ready applications on Google Cloud Platform (GCP) and Microsoft Azure through automated CI/CD pipelines.

EXPERIENCE

- Cognizant** Pune, India
Software Engineer Dec 2021 – Present
 - Full-Stack GenAI Product Delivery:** Built and maintained full-stack features for production GenAI healthcare products, connecting React.js frontends to Python/FastAPI backends and implementing role-based access control (RBAC) for secure access.
 - RAG Pipeline & Vector Search:** Built RAG (Retrieval-Augmented Generation) pipelines, integrating LLMs with MongoDB as a vector database and embeddings to ground responses in domain-specific healthcare data and improve retrieval accuracy.
 - LLM-Powered Feature Development:** Integrated Large Language Models (LLMs) into product features using prompt engineering techniques, and leveraged GitHub Copilot and Claude Code to accelerate development velocity.
 - Frontend Development & UI Engineering:** Developed pixel-perfect, responsive user interfaces from Figma designs using React.js, HTML5, CSS3, Bootstrap, and Tailwind CSS, building reusable components with Hooks, Context API, and Redux Toolkit, cutting the design-to-development cycle by 25%.
 - Backend & Database Development:** Designed and built RESTful APIs and backend services using Python and FastAPI, modeling PostgreSQL schemas and optimizing queries to support frontend data requirements and internal tooling.
 - Performance Optimization:** Improved application performance by 30% through lazy loading, code splitting, memoization, and bundle optimization, while ensuring consistent behavior across Chrome, Firefox, and Safari.
 - Authentication & Security:** Implemented secure authentication and authorization using JWT and Auth0 across frontend and backend, streamlining data exchange and strengthening application security.
 - Cloud Deployment & CI/CD:** Deployed React applications on Google Cloud Run and Microsoft Azure through automated GitHub Actions CI/CD pipelines, reducing deployment time by 40%.
 - Testing & Code Quality:** Refactored legacy React codebases, implemented unit testing, and enforced coding standards, reducing user-reported issues by 35%.
 - Collaboration & Agile Development:** Mentored 3 junior developers and collaborated with cross-functional Agile teams, reducing onboarding time by 50% while improving sprint delivery.

TECHNICAL SKILLS

- Languages:** JavaScript, Python, SQL, HTML5, CSS3
- Frontend Frameworks & Libraries:** React.js, Redux Toolkit, Context API, React Router, Tailwind CSS, Bootstrap, Axios, Vite, Webpack
- Backend & Databases:** FastAPI, REST APIs, PostgreSQL, MongoDB
- Generative AI:** Large Language Models (LLMs), Prompt Engineering, RAG Pipelines, Vector Databases, Embeddings, GitHub Copilot, Claude Code, Codex
- Architecture & Design:** Reusable Component Design, State Management, Performance Optimization, Micro-Frontend Concepts
- Authentication & Security:** JWT, Auth0, Role-Based Access Control (RBAC)
- DevOps & Cloud:** Git, GitHub, GitHub Actions, CI/CD, Google Cloud Platform (GCP), Microsoft Azure
- Testing:** Unit Testing, Usability Testing

EDUCATION

- Priyadarshini College of Engineering** Nagpur, India
Bachelor of Engineering in Information Technology July 2017 – Aug. 2021
